

Patient Group Direction for the supply of Chloramphenicol 0.5% eye drops to named patients registered with the Minor Ailment Service attending Community Pharmacies in NHS Borders

This document authorises the supply of Chloramphenicol 0.5% eye drops by pharmacists to named patients registered on the Minor Ailment Service who meet the criteria for inclusion under the terms of the document

The pharmacist seeking to supply Chloramphenicol 0.5% eye drops must ensure that all clients have been screened and meet the criteria before supply takes place

The purpose of this Patient Group Direction is to allow the supply of the prescription only medicine pack of Chloramphenicol 0.5% eye drops on the Minor Ailment Service

PGD previously approved: October 2017

PGD was reviewed on May 2019

The direction will be reviewed by: May 2021

Author of PGD: Adrian MacKenzie, Lead Pharmacist, Community Pharmacy.

Clinician Responsible for Training and Review: Adrian MacKenzie, Lead Pharmacist, Community Pharmacy.

Specialist clinical review by: Anne Duguid, Antimicrobial Pharmacist

Patient Group Direction for the supply of Chloramphenicol 0.5% eye drops to named patients registered with the Minor Ailment Service attending Community Pharmacies in NHS Borders

1. This Patient Group Direction relates to the following specific preparation:

Name of medicine,	Chloramphenicol 0.5% eye drops
Strength, Formulation	
Legal status	POM Prescription Only Medicine
Storage	Store between 2°C and 8°C. Protect from light.
Dose	Adults and children 1 years and over - Apply one (1) drop every two (2) hours then reduce frequency as infection is controlled and continue for 48 hours after healing, frequency dependent on the severity of the infection. Sleep need not be interrupted in order to administer the drops.
Route/method	Ocular
Frequency	Adults and children 1 years and over - Apply one (1) drop every two (2) hours then reduce frequency as infection is controlled and continue for 48 hours after healing, frequency dependent on the severity of the infection.
Total dose Quantity (Maximum/Minimum)	Maximum 5 days treatment (10ml bottle)
Advice to Patients	Supply Patient Information Leaflet.
	Contact lenses should be removed during period of treatment and for at least 24h after completion of treatment.
	Continue for at least 48 hours after the eye appears normal.
	Blurred eyesight may occur straight after using this medicine. If this happens, do not drive or use any tools or machines until you can see clearly.
	Advise to contact nurse/GP if condition worsens or symptoms persist beyond the five day treatment period
	Store in a fridge (between 2-8°), and keep cap tightly closed between applications. Discard 28 days after opening.

Relevant Warnings	Side Effects Occasional: Transient stinging on instillation.
	Rare: Allergic reaction (persistent burning, swelling of lids) Rarely bone marrow depression and aplastic anaemia have been reported Rarely hypersensitivity reactions eg. angioedema and anaphylaxis have been reported
	Advise to contact nurse/GP if side effects occur

2. Clinical condition

Clinical Condition to	Conjunctivitis will give the sensation of a gritty or
be treated	itchy eye or eyes, with possibly a purulent
	discharge or crusting of the eyelid margins. It will
	only have been present for a few days and is not
	associated with any reduction in vision. The
	affected eye(s) will often look <u>slightly</u>
	red/infected, but this is not usually very marked.
	Pain is not a feature of simple conjunctivitis.
Criteria for inclusion	Presentation in Community Pharmacy with a
	need for treatment of symptoms of bacterial
	conjunctivitis, and registered for the Minor
	Ailment Service (MAS).
Criteria for exclusion	Patient not participating in MAS.
	Children under 1 year.
	Pregnancy, Breast feeding
	Known hypersensitivity to chloramphenicol, or
	any other components of the medicine.
	Recurrence of symptoms within last three months
	Personal or family history of blood dyscrasias
	including aplastic anaemia
	Myelosupression during previous exposure to
	chloramphenicol
	Concurrent administration of medicines which
	may depress bone marrow
	Informed non-consent
Action if excluded/	Refer to GP or GP out of hours service
Referral criteria	Urgent Referral should also be made if patient
	presents with an eye
	- if painful, rather than itchy or gritty
	- if reduced visual acuity
	- if eye looks cloudy
	- if pus level visible in anterior chamber
	- if any history of trauma to eye, or grinding,
	immediately prior to onset of symptoms
	- if possibility of foreign body on/in eye
	- if history of welding without eye protection
	immediately prior to onset of symptoms

	 if no improvement within 48 hours of starting drops any signs of photophobia pupil looks unusual eye inflammation associated with rash on scalp or face glaucoma dry eye syndrome Eye surgery or laser treatment in the last 6 months Any signs of periorbital cellulitis Routine referral should be considered if patient: pregnant breast feeding present for more than 2 weeks despite self care measures with no urgent referral symptoms
Action if declines	Document refusal in PMR and if patient declines alternative management refer to the GP or out of hours service.
Interactions with other medicaments and other forms of interaction	Chymotrypsin will be inhibited if given simultaneously with chloramphenicol.
	The concomitant administration of chloramphenicol with other drugs liable to depress bone marrow function should be avoided.

3. Records-A CP2 form should be generated and the consultation recorded on the Pharmacy PMR

1. The following records should be kept (either paper or computer based)

The GP practice

The patient name and CHI number

The medicine name, dose, route, time of dose(s), and where appropriate, start date, number of doses and or period of time, for which the medicine is to be supplied or administered. The signature and printed name of the approved healthcare professional who supplied or administered the medicine. Whether patient met the inclusion criteria and whether the exclusion criteria were assessed.

Quantity supplied / received and <u>current stock balance</u>

2. Preparation, audit trail, data collection and reconciliation-

Stock balances should be reconcilable with Receipts, Administration, Records and Disposals on a patient by patient basis.

3. Storage-Store between 2-8°C

4. Professional Responsibility -

- ❖ All Health Professionals will ensure he/she has the relevant training and is competent in all aspects of medication, including contra-indications and the recognition and treatment of adverse effects. He/she will attend training updates as appropriate.
- Pharmacist must be registered with the GPhC and contracted to provide the Minor Ailment Service.
- Sources of Evidence used for the PGD creation should be stated
